OsteoSelect®
Demineralized Bone Matrix Putty

Superior handling alternative to autologous bone grafting
OsteoSelect®
Deminerlized Bone Matrix Putty

OsteoSelect was engineered for superior performance\(^1\). The graft does not adhere to gloves yet maintains its placement in the surgical environment. Osteoinductivity of sterile final product is assessed \textit{in vivo}. In this challenging model, every lot tested to date has consistently demonstrated an osteoinductive response. This performance validates Xtant Medical’s expertise in DBM processing.

- Indications include use as a standalone bone graft in spinal procedures
- Equivalent to iliac crest autograft proven in a preclinical spinal fusion model\(^2\)
- Assured osteoinductivity via validated processing
- Cohesive handling that resists irrigation due to robust biocompatible carrier
- Patient safety ensured through terminal sterilization and viral inactivation
